## SUMMARY

### Professional Summary

Driven and disciplined cleaning professional with 1 year of hands-on experience in the highly regulated field of aircraft cleaning, where precision, safety, and speed are non-negotiable. I've built a reputation for maintaining immaculate standards under pressure, working in sync with fast-moving teams, and never compromising on safety or quality.

My time in the aviation industry has shaped me into someone who takes pride in every detail — from spotless cabins to the careful handling of specialized cleaning equipment and chemicals. I've learned the value of teamwork, time management, and accountability, and I believe a clean environment is more than just a task — it's a responsibility that ensures comfort, safety, and trust.

Now, I'm ready to take the next step as a Cleaning Team Leader. I'm eager to lead by example, motivate others through action, and foster a culture of excellence, discipline, and respect. My goal is not just to get the job done, but to uplift those around me, build strong teams, and set a new standard for what great cleaning leadership looks like.

## EXPERIENCE

### Aircraft cleaner

#### MX Care

September 2023 - January 2025, Dubai

Mxcare is a facility management company that offers cleaning, waste management, and environmental services.

- Revitalized the cleanliness of aircraft interiors by implementing a systematic cleaning protocol that adhered to FAA safety standards, leading to a 25% improvement in passenger satisfaction ratings.

## PROJECT

### Boxiee

Video sharing platform • [rakshith360.github.io/boxiee](https://rakshith360.github.io/boxiee)

• January 2025 - April 2025

- Boxiee – Next-Gen Video Sharing Platform
- Currently developing Boxiee, an innovative video sharing platform focused on modern design, fast performance, and user-friendly experience. Responsible for building the frontend using HTML, CSS, and JavaScript, with a focus on responsive layouts, smooth UI interactions, and scalable architecture. Implementing features such as user profiles, video upload pages, playback functionality, and intuitive navigation. This project demonstrates my ability to turn complex ideas into functional, real-world web applications while keeping user experience at the core.

## EDUCATION

### Bipc

Sri Chaitanya jr College • Korutla • 2022

## COURSEWORK

### Frontend developing

Master computer • 2020 • Team lead

- Skill Application – Frontend Development
- Skilled in building responsive and interactive user interfaces using HTML, CSS, and JavaScript. Applied these skills to create clean, accessible layouts and dynamic web features that improve user experience. Able to translate design concepts into functional websites, ensuring cross-browser compatibility, mobile responsiveness, and fast load times. Familiar with version control tools like Git, and capable of collaborating with teams using tools like VS Code and GitHub.

## SKILLS

I have a strong passion for frontend development and bring hands-on experience with HTML, CSS, and JavaScript to create responsive, user-friendly websites. My approach blends clean code with creativity, ensuring every interface is both functional and visually appealing.

I specialize in building layouts from scratch, styling them with modern, scalable CSS, and adding interactive features using JavaScript. I'm comfortable working with both vanilla code and integrating frameworks when needed. I pay attention to the small details — from button

transitions to typography — that make a big difference in the user experience.

Beyond the code, I understand the importance of usability and mobile-first design. I'm always eager to learn new tools, stay updated with the latest trends in web design, and take on challenges that push my skills further.

Whether it's a portfolio site, business page, or web app, I aim to bring ideas to life with clean, efficient frontend solutions.
